

Climate Risk, Valuation, and Investing Certificate

Your journey through our cohort learning model

Here's what you can expect when you join this community of learners and progress through our courses.

TIME COMMITMENT

Each course will be 20-25 hours of learning time - an average of 5-6 hours per week. This includes all learning activities and assignments.

You can learn on your own time each week, but it will be important to not fall too far behind as the weeks progress.

LEARNING ACTIVITIES

Engage with our content through course readings and discussion forums with other professionals in our learning platform.

ASSIGNMENTS

To ensure you gain a thorough understanding of critical concepts, you'll complete varying assignments throughout each course, including quizzes and peer reviewed assignments.

EXPERT FACILITATOR

Our expert facilitator will be available during each course to answer questions about the concepts and content, and moderate discussion forums.
